I felt the change

What is Fortamine?

It is a 100% natural product. Its exclusive formula stops the hair loss, strengthens and its growth. Fortamine has developed to meet the needs of hundred of thousands of people who suffer from hair loss to achieve a noticeable change through using it every day even the places that have no hair.

Fortamine has the exclusive EBE mechanism which is world widely patented property.

This mechanism biologically coats the papain enzyme to doubly increase its properties above the head scalp, regenerate the skin cells and the hair follicles and provide vitamins and fibers to improve the quality of the head scalp and the existing hair and accordingly its growth.

After one hundred and twenty days, stop using it for thirty days. Reuse it another time with the referred amount until reaching the desired volume and thickness of hair.

Method of use

- 1 Wash your hair with the activating Fortamine shampoo with the amount to which you are accustomed.
- 2 Spray three or four times daily from Fortamine spray on the intended areas of your head scalp. If you use Fortamine in an aspirator, put a pipette and spread drops on the head scalp in the parts you need to treat. If you wash your hair at night, it is important, when using Fortamine in a tube or a spray, that your hair is dried with a towel (Don't use hair drier or hair straightener following the use of Fortamine on your head scalp).
- 3 After using Fortamine, whether a spray or a tube, massage the handled areas with your fingertips for two minutes to allow the Fortamine to penetrate your head scalp and pores.
- 4 Repeat this every day for one hundred and twenty days without interruption. After this period, stop using Fortamine for thirty days. Reuse it again with the determined amount.
- 5 Fortamine starts to work within the rest hours. In the morning of the following day, rinse your hair or wash it using Fortamine shampoo.

You can also use Fortamine as a natural fixative for combing hair after moistening it.
